

Loud noises...

How they affect & how to protect

Whether it's at work or at play, our world seems to be getting louder. And while loud sounds aren't always harmful, it is important to be aware of the role they play in your hearing health. [Based on a CDC study](#), as many as 1 in 4 adults have hearing tests that suggest hearing loss in one or both ears from exposure to loud noise.

The good news is, NIHL is the only type of hearing loss that is completely preventable.
